

YOUR COURSE CONTENT

What you will learn

The content is taught in input sessions, which are then practiced and applied within the learning sessions. Students are given subject-related homework tasks on a weekly basis. Students must complete a certain number of these tasks (academic performance), which helps them to self-assess their learning progress and to prepare for their examinations.

Upon completion of the course, students will be able to design and program appropriate software to solve a specific problem in the area of IT and deal with the content taught in the different modules.
