

Summer School Neckar Now III: Transformative approaches to a sustainable future – cities for children

The School of Engineering and Architecture presents the third interdisciplinary Summer School “Neckar Now III: Transformative approaches to a sustainable future – cities for children” taking place from **22nd until 28th of August 2022**.

By 2050 it is predicted that 70% of all children will live in cities. However, cities are often not yet adapted to the special needs of their youngest inhabitants - making it all the more important to design attractive and safe living spaces for families and children

through child-friendly urban planning.

The Neckar Now Summer School addresses the potential and challenges of a city along the river from an engineering and architectural perspective. Heidelberg provides the perfect setting to learn about current trends and methods of sustainable innovation and design. Field trips, input sessions and expert feedback rounds give the participants the ability to develop different approaches to local problems as well as to create their own projects in an immersive experience. An exciting one-week programme for those considering future studies in Water Technology (M.Eng.) or Architecture (B.A. or M.A.).

REGISTRATION

Summer School Neckar Now IV

21.08. - 25.08.2023

Register now for our Summer School “Neckar Now IV: Transformative approaches to a sustainable future – active cities”.

The interdisciplinary Summer School gives international students and young scientists an insight into life, teaching and studying in Germany.

IMPRESSIONS

Summer School Neckar Now 2022

The Summer School Neckar Now was a one week international programme with nearly 35 participants from 14 different countries - an exciting programme for those considering future studies in Water Technology (M.Eng.) or Architecture (B.A. or M.A.).
