

**Tell us, what are you doing right now and what does your professional life look like?**

In my role as a Power Platform Consultant at Freudenberg Sealing Technologies, together with my Team, I focus on advancing the integration of the Power Platform within the organization. My responsibilities encompass overseeing the community and its

activities and managing change. A typical day involves engaging in calls with community members to address their challenges and strategizing ways to enhance platform adoption.

## **What makes your industry so exciting for you?**

In today's context, I consider IT and change management to be crucial elements. My fascination with these subjects grew during my time as a working student pursuing my Masters. I am enthusiastic about exploring the Power Platform, a prominent Low Code technology that incorporates AI and facilitates automation. This platform enables businesses to autonomously create Low Code solutions, reducing dependence on IT. Moreover, its integration into a company requires a shift in people's mindsets

## **How do you imagine your future professional career? What career paths, opportunities for advancement or professional fields would you like to pursue in the next few years?**

Looking ahead a few years, my goal is to become a Change Manager, overseeing change initiatives with a team. To achieve this, I've strategically pursued relevant certifications. In March of this year, I achieved the Certified Associate of Project Management (CAPM) from the Project Management Institute.

## **Application processes are always exciting. How do you remember this phase immediately after graduation? Were there any particular challenges?**

The application process proved to be challenging, yet it provided invaluable insights. I discovered the importance of tailoring my CV and Cover Letter for each application. Despite facing numerous rejections, I persevered and focused on self-improvement. This is a valuable lesson that every student should bear in mind. Fortunately, my persistence paid off, leading to a successful transition from a working student role to a Trainee Position at Heidelberg Materials AG.

## **What else to you like to say...**

- It is very important to gain practical experience during your studies. It also helps you explore different industries and apply what you learn in the classroom to the real world.
- Keep your eyes and ears open. Opportunities can come in unexpected ways.
